Project Details

- WowTruck at Equitas Technologies**

React Native, Java, Swift

The Wowtruck platform has the best drivers who provide superior customer service at affordable rates. Wowtruck is the only app that provides guaranteed quotes for booking mini trucks from point to point. Choose the pickup and drop points, get a guaranteed quote and pay exactly the same amount on completion of the load.
- WowTruck Driver at Equitas Technologies**

React Native, Java.

The Wowtruck Driver is an app which connects the customer and truck driver with affordable rates for both. Drive whenever you want. Partnership with Wowtruck will bring the tools you need to succeed.
- WowTruck HPFT (High Performance Field Team) at Equitas Technologies**

Java.

This app helps in connecting the wowtruck field officers with the ops team and coordinating the customer and transporters leads with meeting and updates. Hpft users also help wowtruck platform in getting the transporters for different bookings.
- Wowtruck Admin at Equitas Technologies**

PHP- Yii2 framework, Mysql.

Wowtruck is a tech based logistics platform which provides simplified and cost effective last mile connectivity to customers as well as higher earning potential for truck drivers. This project contains mobile apps like wow truck driver app, customer app through this connect and service customers efficiently.
- SFAD at Falconnect Technologies**

. Net framework 4.0,Window Application, C#

SFAD is a Success factor to the Active Directory. We shall get the employee details from the Success Factor and we need to process and validaitly the CSV file and store the values in the SQL - Server and the Windows Active Directory using the LDAP connection. We have used the windows scheduler to run the .exe file without any manual action.
- OSRAM Sensorat Falconnect Technologies**

Swift, Java, IoT.

OSRAM Sensor is used to accurately measure your pulse and heart beat zone with BLE sensor Device. Monitor blood circulation with an accurate heart health monitor (similar to ECG or EKG). Functions similarly to pulse oximeters, detecting the change and to provide accurate heart beat measurements graph (similar to ECG / EKG / Cardiograph) - see every heartbeat and BPM.
- Tumotorizado at Falconnect Technologies**

Swift

Tumotorizado is an application of transferring the user valuable goods from one point to another as fast as possible. We have developed a technological tool observing the specific needs of customers linked to each other. It is a contract based traditional service of messaging and charging. It is advance model of zipcode and utilized in specific zone. The app completely monitors the messengers and their location for the official records.
- DealerPlus at Falconnect Technologies**

Swift.

DMS app is specifically designed for a group of community. Through the application the user can showcase their own cars and also be able to manage their inventory funding details. Dealers can purchase the car listed in the application. Dealers can also avail funding for the specific car purchased through this application.
- Zipcode – Messenger at Falconnect Technologies**

Objective- C.

Zipcode is an application of "express messaging" that connects consumers, independent messengers and stores as fast as possible. We have developed technological tools observing the specific needs of customers linked to each of our business segments. For their private clients and companies we develop a mobile application that serves to contract traditional services of messaging and charges.
- Mopro Direct Connect at Falconnect Technologies**

Xamarin Android.

Mopro Direct Connect is an application used for Mopro Client. Using this application the client changes the things which they have to change things like design, image, text or button. In application we have used voice recognition and VOIP for contacting the client.
- Cargoji – Book a Mini Truck in India at Falconnect Technologies**

Objective- C.

Cargoji is a revolutionary new improvement to Logistics systems in India logistics is a closed circuit with low supply and high fluctuating demand. In order to bridge this gap, Cargoji is providing a platform for all the customers to hire a mini truck to meet them on demand logistics needs.
- Cargoji – Driver at Falconnect Technologies**

Objective- C.

Cargoji is providing a platform for all the customers to hire a mini truck to meet them on demand logistics needs. By tying up with local businesses and transport operators, Cargoji has created a Win-win proposition to improve the Logistics services in our cities and grow trucking.
